PROJECTS

MEET EAT TREAT ⬈
Frontend Development
The Task in this Project is that, to design this website.I have given a content or Assets from which I have to design the whole Website.I started to arrange ,where I am going to put which element.After than I decided the theme and started working on it.Side by side I was communicating with my client for better understanding their requirements.I used figma tool here along with Frontend programming.

E-Tender Searching BOT
Our Project Goal was to search the latest Tender published on various Government sites by automating the process .To develop the software various python modules, front end technology, web scrapping tools and automation API's are being used.
